Supra Tip for the eKey

In an effort to help ease the fear of being out in more rural areas and the eKey app on your phone not functioning we have a quick fix for you.

The eKey app should be updating on its own overnight but in those rare times that maybe for one reason or another it does not update just get in the habit of manually updating your eKey each morning before you leave your home. **It only takes seconds!**

- Open your app on the phone
- Tap the “update” button
- According to Supra you are now good to go for the day no matter where you are located.
