Showing Notifications

Listing agents have several options for sending showing notifications. Use SupraWEB to add multiple people (i.e. the listing agent, office staff, and the home owner) to receive beginning and ending showing notifications. Notifications are sent to email addresses or cell phone numbers (as text).

Notification Recipient	Showing Notification Action
Listing agent	To receive notifications, make sure your email is correct in the <i>Email Address</i> field and check the <i>Send me showing notifications...</i> box in <i>General Email Settings</i> .
Partner or team member	Add partners to receive all showing notifications by entering their email in the <i>Also send a copy to: (CC)</i> field.
Client	To have your client receive notifications, go to the specific keybox in your inventory, check the box and enter your client's email.

The *Showing Notification* feature alerts the listing agent when a keybox key container is opened to start a showing. This information can be displayed on all activity reports.

Showing information includes keybox serial number, associated listing address/information, date of showing, the beginning and the end of the showing time (if enabled), and displays on all activity reports in SupraWEB.

End of Showing Notification

Boards or associations must contact Supra to "opt-in" to showing notifications first for this feature to be available. The eKEY application uses multiple methods (including GPS data captured when the keybox is opened) to detect when the showing has ended. *End of Showing (EoS)* information includes the listing address (or keybox serial number if the listing address is not available), and date and time the showing ended. End of Showing notification allows the listing agent and designated recipients to see when the showing ended for the property.

Notification Enabled	Showing Notification Checkbox Says:
Not Enabled	<input type="checkbox"/> Send me showing notifications for all keyboxes in my inventory
Enabled	<input type="checkbox"/> Send me beginning and estimated end of showing notifications for all keyboxes in my inventory

Below is an example of an EoS notification message that is transmitted to the designated recipients.
